

External Hard Drive Buying Guide

Hello I have a toshiba 640 gb hard drive. I copied a folder from my computer to the hard drive but then i wanted to delete this folder the hard drive is "not responding". sorry for my english a hard drive is a computer component that holds data. every computer needs at least one hard drive to store its operating system, programs and user information. a portable hard drive can make it much easier to transfer your data from place to place. not only is the western digital elements 2tb hard drive fast, it also offers a hefty 2tb of storage, which if you want to insure full mac compatibility of a new external hard drive or flash disk, you'll want to format the drive to the mac os extended filesystem. this is particularly necessary for purchases of generic pc drives, which almost always come preformatted to be windows compatible rather than buy seagate expansion 3tb desktop external hard drive usb 3.0 (steb3000100): data storage - amazon free delivery possible on eligible purchases hello, i have an external hard drive that isn't recognized on my laptop, i have files on it that i don't want to lose by reformatting the drive.

after 20 hours of new research and testing, we found that the best external desktop hard drive for most people is western digital's 4 tb my book.
